What is a Naturopathic Doctor?

Naturopathic Doctors are highly educated primary care providers who integrate standard medical diagnostics with a broad range of natural therapies. They work in partnership with other regulated health care providers to ensure that patients receive the most comprehensive and effective care possible.

Who can apply for assistance with the naturopathic subsidy program?

Anyone that does not have the financial resources to afford naturopathic care and does not have extended health benefits is eligible for the naturopathic subsidy program.

How much assistance is provided?

Every patient must pay a portion of the visit/therapy fees. The level of subsidy given depends on the level of financial need established through the application process. Everyone is assessed individually and options will be given during the application interview.

Can my whole family apply for subsidy?

Yes. Fill in the names on the application form and we will assess your subsidy for the entire family.
